

4 Reasons to Use a Stainless Steel HERA

By [IBT](#) | [March 31, 2014](#) | [Bearings, Power Transmission](#)

If you use a High-Efficiency Right Angle (HERA) or a worm gear drive, then you should consider Hub City's new stainless steel HERA, which hit the market in 2014. Perfect for wet environments, it is smaller and more power dense than a worm gear drive—with all the benefits of the HERA.

HERA Replaces Worm Gear Drive

For companies still using a traditional worm gear drive, the HERA from [Hub City](#) can replace it—while still delivering high power, in a smaller gearbox. Its astonishing 90% efficiency rate can save businesses up to \$550/year in electricity with each increment of motor horsepower.

Better yet, the HERA delivers more power. In fact, up to 2x more torque than traditional worm gear drives.
